PREFACE

The Government of India is committed to the development of 'Indian Systems of Medicine (Ayurveda, Siddha & Unani) and Homoeopathy' as well as non-drug therapies like Yoga & Naturopathy. The traditional systems of medicines are part of our cultural heritage and have rendered cost effective and efficacious patient care through the centuries. There are at present about 4,00,000 practitioners of Indian Systems and 1,50,000 practitioners of Homoeopathy in the country.

For purposes of successful regulation and development, it is necessary to have accurate information on ISM practitioners and ISM Institutions. Such information was compiled for the first time when the first volume of 'Indian Systems of Medicine & Homoeopathy' was published in 1980. The publication has been revised, enlarged and updated since then from year to year. This is the XII Issue in the series.

The present publication includes information available as on 1-4-1991. Certain new tables have also been incorporated. This publication would not have been possible but for the cooperation of State Governments, Directorates of Indian Systems of Medicine, Directorates of Homoeopathy, State Boards of Indian Systems of Medicine and Homoeopathy, and many other similar Institutions. I thank them all for their cooperation. I hope this publication will be useful to all those interested in research planning, administration and development of these systems in India and abroad.

Suggestions for improvement are welcome. Errors and omissions, if any, may kindly be brought to the notice of Deputy Director (Planning and Evaluation), Ministry of Health & Family Welfare.

Sd/-
(R.L. MISRA)
Secretary
Ministry of Health & Family welfare.

AN INTRODUCTION TO INDIAN SYSTEMS OF MEDICINE & HOMOEOPATHY

1. AYURVED

INTRODUCTION

Human life and knowledge of preserving it as a going concern, in the face of overpowering and brute physical and biologica environment, must have come into being almost simultaneously. It has to be so. There cannot be any other plausible explanation, other than this, to account for the continuity of human race and survival and its several highly developed cultures and civilizations. All known cultures of the Past-Egyptian, Babylonian, Jewish, Greek, Indus-valley etc. have their own equally glorious and useful systems of medicine and health care.

In India, development and growth of such a body of knowledge known as Ayurveda, meaning science of life, was coeval with the growth and evaluation of Indian Civilisation and culture. Vedas, which are considered to be the repositories of recorded Indian Culture have mention of this knowledge both in the theoretical and practical form. There is discussion of theories about the composition of living and non-living matter, the physical, biochemical, biological, psychological and spiritual components of man and the vital motive forces working both inside and outside the body. In other ancient works there is mention of such current medical subjects like anatomy, physiology, aetiology, pathology, treatment and environmental factors This medical knowledge has been the work of ages. It is the outcome of the great power of observation, generalisation and analysis combined with patient labour of hundred of investigators spread over thousands of years. This knowledge has played so important part in the development of Indian Culture that it has been documented in an integrated form in the Vedas which are considered to have been originated from Gods. Most of this mythological and medico-religious genesis of Ayurveda is even today shrouded in the mist of antiquity.

Ayurveda means the science of life. Around 1500 B.C. Ayurveda's fundamentals and applied principles got organised and enunciated. Atharvaveda (one of the four most ancient books of Indian knowledge, wisdom and culture) contains 114 hymns or formulations for the treatment of diseases. In this

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

sense Ayurveda is considered to have divine origin representing one of the oldest organised system of medicine for positive health and cure of human sickness. Making use of systematic careful observation and documenting detailed experience over the past several thousand of years, it has grown into a very comprehensive health care system with two major schools and eight specialisations. It has a school of Physicians and a School of Surgeons referred in literature as 'Atreya Sampradaya' and 'Dhanvantri Sampradaya' respectively.

The most important and massive ancient compilation of the School of Medicine is known as Charaka Samhita. It contains several chapters dealing at length with therapeutic or internal medicine. About 600 drugs of plant, animal and mineral origin are described in it. Besides, this compendium also deals with other branches of Ayurveda like anatomy, physiology, aetiology, prognosis, pathology treatment and medicine etc.

An equally exhaustive ancient compilation, Sushruta Samhita exists relating to school of surgery. It deals primarily with various fundamental principles and theory of surgery. More than 100 kinds of surgical instruments including scalpels, scissors, forceps, specula etc. are described along with their use in this valuable document. Dissection and operative procedures are explained making use of vegetables and dead animals. Descriptions of how to go about doing incision, excision, extraction and bandaging etc. are detailed in this compendium. In addition, this document also mentions of such other topics as anatomy, embryology, toxicology and therapeutics. It also has a mention of about 650 drugs.

In course of time Ayurveda, which started as a magicoreligious practice, matured into a fully developed medical science with eight branches which have parallels in the modern western system of medicine. The growth of these eight specialities gave Ayurveda another name of Astanga Ayurveda. The medical knowledge was divided into the following eight branches :

1. Internal Medicine—KAYACHIKITSA
2. Paediatrics—KAUMARABHRITYA
3. Psychiatry—GRAHACHIKITSA
4. Opthalmology—SALAKYATANTRA
5. Surgery—SALYATANTRA
6. Toxicology—VISATANTRA

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

7. Geriatrics—RASAYANATANTRA
8. Knowledge of Virilfics—VAJIKARANATANTRA

The classical works of Ayurveda describe it as under :

It is that knowledge of life which deals elaborately and at length with conditions beneficial or otherwise to the humanity and to factors conducive to the happiness or responsible for misery or sorrow besides indicating measures for healthful living for full span of life.

Ayurveda is also considered as 'Science of Life'. This probably makes it the earliest medical science having positive concept of health to be achieved through a blending of physical, mental, social, moral and spiritual welfare.

'Dhatus' refer to different vital body organs or parts. There are seven 'Dhatus' in the body. These are Rasa (body liquids)' Raskta (blood), Mamsa (muscular tissue), Meda (Adipose tissue), Asthi (bone tissue), Majja (nerve tissue and bone marrow) and Shukra (generative tissue including sperm and ovum).

Malas : This concept deals with the waste products of the body. The food consumed by human body brings into existence and builds further the above mentioned seven Dhatus or vital body organs. During this metabolic process each organ produces a specific waste or Mala such as stool, urine, sweat, nails, hair etc.

Health, according to Auyrveda is balanced (inter-intra) state of all the Doshas, Dhatus and Malas. Healthy person enjoys equilibrium of the humours, the body tissues and excretory functions normally experienced by man in the process of gratifying his senses, mind and soul. Ayurveda deals with the total human being comprising of 'Tridoshas', 'Dhatus' and 'Malas' and the relationship of his totality with the outside world or the universe.

For promotive and positive aspects of health, Ayurveda has worked out detailed daily and sessional pattern of life activity. It emphasises regulated diet, sleep and sex.

Treatment in Ayurveda

Traditional Ayurvedic medicine is one of the important part of the splendid cultural heritage from our ancient civilisation. It is the summation of the Nations'. Experience in struggling against illness through centuries. It has played an important role in the prosperity in our nation and is still of incalculable value. With its unique and complete theoretical system, it stands firmly among the medical sciences of the world.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Treatment of the disease generally consists in avoiding factors responsible for causing disequilibrium of the body matrix or of any of its constituent parts, through use of medicines, suitable diet, activity and regime for restoring the balance and strengthening the body mechanism to prevent or minimise future occurrence of the disease. While treating the whole, man is considered including the disease in question.

Present Status of Ayurveda in India

Ayurveda is the oldest medical system of the world and is based on vast experience over thousands of years. One of our most ancient book "Atharvaveda" contains many hymns or formulations for treatment of diseases. Since then the Ayurveda is based on the knowledge of systematic and careful observation and documenting detailed experience over the several thousands of years.

According to the ancient books of knowledge, health is considered as a pre-requisite for achieving the supreme ends of life consisting of righteousness, wealth, artistic values and spiritual freedom. Preventive and curative aspects of diseases are considered as important components of the concept of positive health.

Ayurveda deals elaborately with measures of healthful living during the entire span of life and its various phases. Besides dealing with principles for maintenance of health, it has also developed a wide range of therapeutic measures to combat illness. These Principles of positive health and therapeutic measures related to physical, mental, social, and spiritual welfare of human beings. Thus Ayurveda become one of the oldest system of medicine dealing with both the preventive and curative aspects of life in a most comprehensive way.

Basic Principles

Ayurveda is based upon certain principles of physical, chemical and biological sciences. In addition it gives special consideration to spiritual aspects of life in the understanding and treatment of human diseases. There are four key concepts in Ayurveda. These together guide the preventive, promotive and curative aspects of the practice of Ayurveda. These concepts are :

1. Panchamahabhutas
2. Tridoshas
3. Dhatus
4. Malas

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Panchamahabhutas : These refer to five basic alements of air, water, fire, earth and sky. Creation of all forms of life including human life is credited to these elements.

Tridoshas and Dhatus : These two concepts together explain all the physicological and biological processes taking place in living body. As such, they directly relate to pathogenesis of human diseases and their symptoms.

The three constituents of Tridosha are 'Vata', 'Pitta' and 'Kapha'. These three terms are broadly comparable to the modern concepts of motion, energy and inertia respectively. The concept of 'Kapha' and/or inertia deals with cellular and intracellular structure of the human body. It is responsible for the support and stability to the body. 'Pitta' refers to energy and is concerned with the metabolic and biochemical processes which generate heat and energy within the body. Function of 'Vata' or motion is to regulate proper use of energy by the different cellular structures of the body.

Now after independence, the Govt. of India at first consittuted Ayurveda Pharmacopoeia Committee in 1962 with a view to maintain the uniform standards in preparation of drugs and to prescribe working standards for compound formulations including tests for identifying purity and quality of the drugs. Pharmacopoeial Laboratory for Indian Madicines at Ghaziabad (U.P.) established as a standard setting-cum-drug testing laboratory for Indian Medicine including Ayurveda, Unani and Siddha systems at National level. Similarly Central Council of Indian Medicine was established for laying down and maintaining uniform standards of education in the field of Ayurveda, Siddha and Unani and regulating practices in these fields under the existing provisions. At national level a model institute namely National Institute of Ayurveda was established in 1976 at Jaipur (Rajasthan) in collaboration with the Govt. of Rajasthan as an apex institution of Ayurveda to develop high standards of teaching, training and research in the field of Ayurveda. Besides this Central Council for Research in Ayurveda and Siddha was constituted in 1978 with a view to initiate, aid, guide, develop and coordinate scientific research in different aspects fundamental and applied Ayurvedic and Siddha system of Medicine. During 1978, Indian Medicines Pharmaceutical Corporation Ltd. was incorporated with a view to meet the demand of units under Central and State Governmets

2. UNANI SYSTEM OF MEDICINE

Origin and Development

Unani system of medicine originated in Greece (460 BC-377 BC). It was further enriched and developed by Arabs and Persians. Unan is the Arabis name for Greece which denotes the origin of the system. Hippocrates established his philosophy of health on the word 'Physis' which meant simply 'Organism' and he postulated that life comprised a reciprocal relationship between organism and environment. He explained that disease was a normal process and its symptoms were the reaction of the body to the disease. The chief function of the physician was to aid the natural forces of the body. He held that there exists in the body 4 humours that keep up the balance of it. He also laid emphasis on diet and a few drugs for cure of the disease.

A galaxy of Unani medical luminaries have come to the forefront after Hippocrates, Aristotle, Herrophillus, Erasistraus, Ibn Sina, Diascordes, Galen, Al-Mamun Ibn Masawayh, Rhazes Ibn Ishaq, Ibn al Baitar et. al. have contributed a lot to this system of medicine. Aristotle's study on anatomy and embryology, Galen's on the value of anatomy and experimental physiology, Ibn Masawayh's book on dietetics drugs, fever, venesction, cupping, stomach disorders, caterrh, diarrhoea, colic animals and alchemy and Avicenna's Medical Book "Canon" are the bright examples of the development of Unani system of medicine. The most esteemed of Rhazes medical works Al-Hawi was an Encyclopeedia of medicine and surgery. He had written some important books, like Al-kitabul Mansuri and Treaties on Smallpox and Measles. Apart from the above, one of the most renowned physicians of all the time was Ibn Sina (980-1037 AD) a man eminent as physician, philosopher, scientist, statesman and poet who has kept this system of medicine alive for all times to come.

Unani System in India

Unani medicine was introduced in India about a thousand years back. The history of Unani system in India can be divided into two periods :

* Pre-Mughal and Mughal Period,
* British Period.

Pre-Mughal and Mughal Period

From the Court Physicians Note Books it is known that almost all rulers of Sultanate period were practising Unani system.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

of medicine for the welfare of the people. During Alauddin Khilji's period (1296-1316), Hakim Sadruddin Damishqi (master physician) occupied a high rank and after him Hamid Motaraz who was famous for his diagnosis by feeling pulse and examining urine. The system existed during the reign of Sultan Altamish also. Hakim Zia Muhammad was Court Physician of Mohammad bin Tughlaq. The famous books Tibb-e-shahabi, Kafaya Mujahidiya and Ma-dan-ush-shifa Sikander were published during the pre-Mughal period. During the Mughal period, Unani medicine was practised extensively. Hakim ali Geelani, Hakim Ananullah Khan, Mirza Muhammad were the Court Physicians of Akbar, Jahangir and Mohammad Shah respectively. The famous books Ummul Ilaj, Mizanut Tibb, Qurabadeen-e-Qadri, Shaah-e-Geelani were published during Mughal period. Unani medicine was popular during Mughal period among the masses as well as the rulers.

British Period

Although the British looked down upon the Unani medicine, the Nawabs of some States patronised this system. Of them Nizam of Rampur, Nawab of Tonk, Maharaja of Patiala deserve to be mentioned. Also some Hakims of Delhi, Lucknow and Hyderabad took concentrated measure to stop the tide of decay and decline of Unani system during this period. Sharifi family of Delhi and Azizi Family of Lucknow are worth mentioning on whose efforts Unani system of medicine survived in British Period

Fundamental Principles

The Unani system of medicine is based on the Humoural theory which presupposees the presence of four humours namely, Blood (Dam), Phlegm (Balgham), Yellow bile (Safra) and Black bile (Sanda) in the body. The temperament of persons are expressed accordingly by the words Sanguine, Phlegmatic choleric and Melancholic according to the preponderance of them in the body. Everybody has got a unique humoural constitution which represents the healthy state of humoural balance of the body. The Unani medicine plays a vital role when the individual experience humoural imbalance. The correct diet and digestion can bring back the humoural balance. It's main emphasis is on diagnosis of a disease through Nabz (pulse), Baul (Urine), Braz (stool) etc. It has laid down six essential pre-requisites for the prevention of diseases. There essential, known as 'Asbab-e-sitte Zarooriya' are air, drinks, foods, bodily movement and repose, psyshic movement and repose, sleep and wakefulness and excreation and retention.

2—88 M. of Health & F. W./N. D./93.

Digitized by Arya Samaj Foundation Chennai and eGangotri

There are various types of treatment in Unani system of medicine, These are :

(i) Ilaj bil-Tadbeer (regimental therapy)
(ii) Ilaj bil Ghiza (dieto therapy)
(iii) Ilaj bil Dawa (Pharmaco therapy)
(iv) Jarahat (Surgery)

The regimental therapy includes venesection, cupping, sweating, diuretis, turkish bath, massage, matastatis, cauterisation, purging, vomiting, exercise and leeching etc. Dieto therapy aims at treating certain ailments by administration of specific diets, whereas pharmaco therapy deals with the use of naturally occuring drugs, mostly herbals though drugs of animals and mineral origin and surgery have been in use in this system of quite long. In Unani medicine both single drugs and compound drugs are employed in the treatment of various complex and chronic disorders now-a-days.

Diagnosis and Treatment

The Unani system of diagnosis of disease and treatment restoring health, revolves round the concept of temperament or 'Mizaj'. The humours also have specific temperament. Changes in temperament are related to changes in the balance of humours. Any change in temperament brings about a change in the health of the individual. Thus imbalance of the harmony of humours and temperament alongwith failure of one or more parts of the body to eliminate pathogenetic waste causes disease. The diagnosis may involve :

- Measuring of body heat by feeling of pulse palpitation and use of thermometre.
- Urine examination for ascertaining functioning of Kidney, Liver and digestive system.
- Examination of stool.
- Close observation of the condition of eyes, lips, teeth, throat and tonsils.
- Emotional and mental status of the patient is also taken note of, as indicative of certain imbalance in the functioning of human body.

After complete examination of the patient, treatment is started. Treatment is mainly done through drugs which also have identified and a specific temperament (hot, cold, moist, dry etc.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

in different degrees). Use of drugs restores balance of humours by activising self preservation mechanism of the body. The system believes in the presence of some natural self preservation mechanism in human body. The drugs are supposed to stimulate and strengthen the action of this defence mechanism. In other words, drugs not only normalise the existing imbalance but also improves the natural defence mechanism of the body so as to prevent or minimise chance of future disease. Thus the treatment generally is both curative and preventive in nature and effective. The Unani system recognises inoculation and immunization preventive measures against diseases. Regulation of diets constitute an important part of treatment.

Advent of Unani Medicine in India

The Govt. of India constituted a Unani Pharmacopoeia Committee consisting of Unani Experts and Scientists of other sciences to prepare an Official Formulary and Pharmacopoeia of Unani drugs. The first part of National Formulary of Unani Medicine (English Version) containing 441 compound formulations has already been published and the work on second part of it is in progress alongwith 200 newly drafted and compiled compound Unani Formulations for its third part (English Version). The Govt. of India has set up National Institute of Unani Medicine at Bangalore in collaboration with the State Govt. of Karnataka in 1975 in order to serve as a model of teaching, training and research in the country. The Central Council for Research in Unani Medicine (CCRUM) was established in 1979 in order to initiate, aid, conduct, develop and co-ordinate the scientific reasearch in Unani Medicine but the research studies in Unani Medicine were first perceived and started by Masihulmulk Hakim Ajmal Khan in 1920, much before setting up of CCRUM in 1979.

3. SIDDHA SYSTEM OF MEDICINE

Siddha is one of the ancient medical systems of the world. It was founded by Saints (Maharishis) who were highly talented Scientists and who perfectly understood the human mind and body during health and illness from embryonic life to death. The founders, who were known as Siddhars, lived in various parts of India, in general and Southern India in particular, specifically Tamil Nadu. This System of Medicine developed within the Dravidian Culture which is of the pre-vedic period. The Siddha System is largely therapeutic in nature.

The medical literature of Siddha which are mostly in the form of cudjan leaves in Tamil language and scientifically and systematically codified into various subjects starting from Paediatrics to

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

Geriatrics including the intermediary subjects like Ophthalmology, Gynaecology etc.

This system also deals with the concept of salvation in this life. The exponents of this system consider achievement of this state is possible by medicines and meditation.

Present Status of Siddha

Govt. of India has set up a Pharmacopoeia Committee for Siddha System of Medicine for preparing official formularies/ Pharmacopoeias with a view to maintain uniform standard in preparation of drugs and to prescribe working standard for compound formulations including test for identifying purity and quality of the drugs. Central Council of Indian Medicine, constituted under IMCC Act, 1970, regulates the education of Siddha System and Central Council for Research in Ayurveda & Siddha was established in 1978 with a view to initiate, undertake and regulate the research work in Siddha System of Medicine also.

4. NATUROPATHY AND YOGA

4. Naturopathy

Naturopathy is not mainly the system of treatment but a way of life. It is often referred to as drugless treatment of disease. It is based mainly on the ancient practice of the application of the simple laws of Nature. The system is closely allied to Ayurveda so far as fundamental principles are concerned. There are two schools of thought regarding the approach of Naturopahty. One group believes in the ancient Indian methods while the other mainly adopts western methods which are more akin to modern physiotherapy.

The advocates of Naturopathy pay particular attention to eating and living habits, adoption of purificatory measures, use of hydrotherapy, cold packs, mud packs, baths, massage and a variety of methods/measures based on their innovative talent.

A carefully supervised total fast or partial fast is advocated to clear the system of toxic build up. Water and/or dilute fruit juices are permitted. The Naturopathy has to keep a strict supervision lest the patient may develop physical and emotional untoward effects. The system believes that the way of life, if properly organised and if one does not retaliate, one can get the bounties of energy, health and happiness from the benevolent nature. What one is to do for prevention of disease, promotion of health and to

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

get therapeutic advantages is to adopt means natural to nature with no heroic measures of treatment or retaliation or distortion of nature.

5. Yoga

The system of Yoga is also as old as Ayurveda. It was about 2500 years back when Patanjali propounded it in a systematic form, which consists of eight components namely restraint, observance of austerity, physical postures, breathing exercises restraining of sense organs, contemplation, meditation and samadhi. These steps in the practice of Yoga have potential in improvement of social behaviour, personal behaviour, improvement of physical health, improvement of better circulation of oxygenated blood in body, restraining the sense organs and thereby the mind and inducing tranqulity and serenity in the mind. The practice of integrated type of Yoga prevents psychosomatic disorders/diseases and improves individual's resistance and ability to endure stressful situations. Meditation, one of the eight components mentioned earlier, if regularly practised has the capacity to reduce unwholesome bodily responses to a bare minimum so that the mind can be directed to perform more fruitful functions.

A number of physical postures are described in Yogic works to improve bodily health, to prevent diseases and to cure illnesses. The physical postures are to be chosen judiciously and are to be practised in a right way to derive the benefits of prevention of diseases, promotion of health and for therapeutic purposes. Breathing exercise helps in supply of proper oxygenated blood in the body.

Studies have revealed that the Yogic practices improve the intelligence and memory and help in developing resistance to endure situations of strain and stress and also to develop an integrated psychosomatic personality. Meditation is yet another exercise which can stabilise emotional changes and prevent abnormal functions of vital organs of the body. Studies have shown that meditation not only resrtrains the sense organs but also controls the autonomic nervous system.

Present Status of Naturopathy and Yoga

The National Health Policy recognises the role of Naturopathy and Yoga for promotion of health and prevention of diseases. Central Council for Research in Yoga and Naturopathy was established in 1978 with a view to initiate, aid, develop and co-ordinate scientific research in different aspects of Yoga and Naturopathy

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

and to promote and assist institutions of research for the study of diseases, their prevention, causation and remedy in the field of Yoga and Naturopathy. The Central Research Institute for Yoga was established during 1976 with a view to conduct research for the study of diseases. The National Institute of Naturopathy, Pune has been registered as an autonomous body during 1984 under the Ministry of Health and Family Welfare.

5. AMCHI & TIBETAN SYSTEMS OF MEDICINE

The Amchi system of medicine is also known as the Tibetan system of medicine and is in vogue in Ladakh district (Jammu and Kashmir), Lahaul (Himachal Pradesh), Arunachal Pradesh, Sikkim and some regions of Himalayas. The system traces its origin to Ayurvedic system of India. The medical system since its delivery by Lord Buddha while meditating near Budh-Gaya in course of time had accumulated a huge literature and Amchis of great fame and repute were produced. Therapy under the system is divided into treatment by herbs, minerals, animal organs, spring and mineral waters, moxibustion and by mysticism and spiritual powers.

The Tibetan system is patronised by His Highness the Dalai Lama. Tibetan Medical Institute of Dharamshala, Himachal Pradesh, was established by H.H. Dalai Lama in 1961 with a pharmacy, Tibetan Medical College, 10 bedded hospital, museum of drugs, surgical instruments, texts and medical and astrological paintings besides wings for Literary Research, Astrology and Astronomy. There are 31 dispensaries in India.

The Central Council for Research in Ayurveda and Siddha under the Ministry of Health and Family Welfare, is having a Amchi Research Unit to carry out clinical research and to conduct survey of local drugs potentials.

6. HOMOEOPATHY

Definition

"Homoeopathy is a system of treatment of diseases by drugs usually prescribed in minute doses, that in a healthy person would produce symptoms like those of disease."

Origin

The Homoeopathic way of healing was devised by the great German Physician Dr. Christian Fraderick Samuel Hahnemann in the late 18th century. He came across an old idea of the efficacy of 'cinchona bark' in treating intermittent fever due to its

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

tonic effect on the stomach and conducted experiments upon himself in order to get the truth. He deduced from the experiment that cinchona is used as a remedy for intermittent fever and it could produce symptoms similar to those of intermittent fever in healthy people.

The law of similia 'Similia Similibus Curentur' or 'let likes be treated by likes' thus forms the basis of treatment under the Homoeopathic system of medicine. Homoeopathy is a specialised method of drug therapy employed to cure the natural sufferings of a person by the administration of drugs which have been experimentally proved to posses power of producing similar artificial suffering or symptoms of diseases in healthy human being.

Basic Concepts

Homoeopathy is the youngest medical science and it has been in the service of mankind for almost two centuries. Its main emphasis is on the remedical agents in illness and in health. It is a low cost system using only non-toxic drugs. The price of homoeopathic medicine is almost negligible while the benefits to human health are commendable. Even in this short period of time it has established a reputation for successful treatment of chronic illness.

Doctor Samuel Hahnemann, who is the father of this system of medicine, introduced it for the use of humanity through his scholarly work 'Organ of the art of healing' in the year 1810.

Due to vearious reasons like low-cost and non-toxic nature of its drugs, Homoeopathy is getting in India a very high recognition and acceptance from the people. Having its origin in the modern scientific age it has the benefit of basing its theory and concept on demostrable scientific principles and procedures.

It is based on four cardinal principles of :

1. The law of Similars
2. The law of Direction of Cure
3. The law of Single Remedy
4. The law of Minimum Dose.

Among this the most fundamental is the first 'Law of Similars'. This law states that the symptoms experienced by the sick person are not the disease. Symptoms are reactions of the defence mechanisms of the body which it mobilises in order to counteract a morbific influence, be it a specific stress such as bacteria or viruses or a non-specific stress such as climatic changes, environmental pollution,

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

mental and emotional disturbances etc. Symptoms are the best possible reaction of the organism under stress. They are the means through which the organism tries to regain its lost balances. In order to help the organism to achieve this Homoeopathic physician should assist and strengthen these reactions through hia drugs rather than suppress them.

The other three laws further refine the above central concept by describing the different phases likely to be experienced in the process of treatment, selection of only one single agent most potent to create in a healthy man the same symptoms as are being experienced by the sick person, and determining the minimum possible to be given.

Health and Sickness in Homoeopathy

This system assumes that any disease symptoms syndrome is the reaction of the defence mechanism of human body against the disease causing agents. The symptoms are the means through which the body tries to regain its lost balance. According to it, the symptoms syndrome in a disease is not the disease per se, but the reaction of the defence mechanism mobilised by the body in order to counteract a morbific influence existing in the body and causing the loss of balance of the healthy body. Thus the disequilibrium in the normal functioning of the organs of body implies sickness.

Diagnosis and Treatment

The classical approach to the problem is to individualise each person although they may be suffering from the same disease. The practitioner has to have detailed and long interviews to find out specific characteristics of the defence mechanism of each sick person. He has to study the patient's mental, physical and emotional conditions. Such an examination alone gives an understanding of the imbalance and associated complex of symptoms of the sick person.

Treatment in Homoeopathy

In Homoeopathy primary emphasis is on therapeutics. It takes a holistic approach towards the sick individual and treats his disturbances on the physical emotional and mental levels at the same time. Its aim is to bring back the lost equilibrium of the sick individual on all the three levels by stimulating and strengthening his body's defence mechanism. The remedy for treatment is chosen on the assumption that the patient is extremely sensitive to it and that this remedy can produce the symptomatology of the sick person.

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

In other words for treatment it believes that let the same substance which can produce specific symptoms in a healthy individual cure those same symptoms in a sick individual. The prescribed remedy strenghens the body's defence mechanism which in turn reestablishes order or balance again.

In deciding the treatment the Homoeopathic Practitioner follows the well known principles of 'Similia Similibus curentur.' In simple terms it means let the same substance which can produce specific symptoms in a healthy individual cure those same symptom in a sick individual, although the symptoms have arisen from another cause i.e. Bacteria, Viruses etc. The cure is based on the assumption that the patient is extremely sensitive to that particular remedy and only to that remedy which can produce his symptomatology.

Similarly, Homoeopathy has definite effective treatment for such diseases as diabetes, arthiritis, bronchial asthma, epilepsy, skin eruptions, allergic conditions and mental or emotional disorders.

Advent of Homoeopathy in India

Homoeopathic system of treatment was first introduced in India in 1839 by Dr. J.M. Honigberger. During his visit to India he cured Maharaja Ranjit Singh of Punjab though his native physicians failed to do that. Some famous statesmen of India like Ishwar Chandra Vidyasagar and Raja Radhakanta Dev Bahadur were also successfully treated by this system of medicine. The Homoeopathic system of treatment spread successfully not only among the poor people but also among the civil and military personnel throughout the country. This system of treatment is economical and it has got no side effects. So the people wanted the official recognition of Homoeopathy and such a resolution was passed by the Constituent Assembly in 1948 and later on by the Parliament. A number of Commissions, Committees and Associations were formed in order to popularise it throughout the country. The Central Government as well as State Governments started taking much more initiative to introduce it in fuller sense. The people found the system to be less expensive, effective and with no side effects. As a result, a number of dispensaries were opened throughout the country to provide Homoeopathic treatment for various diseases. Very few of doctors were trained and qualified. People became concerned about how proper Homoeopathic education can be imparted, how the quality of Homoeopathic drugs could be improved and how the knowledge could be reoriented and updated. Therefore, the Govt. constituted Homoeopathic Pharmacopoeia Committee in 1962 with a view to maintain uniform standards in preparation of drugs

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

and to prescribe working standards for identifying purity and quality of drugs. Similarly Homoeopathic Central Council Act, 1973 was introduced in 1973 and Central Council of Homoeopathy was established in 1974 with a view to maintain and regulate the unifom standards of education, maintenance of Central Register of Homoeopaths etc. A Homoeopathic Pharmacopoeia Laboratory was established at Ghaziabad (U.P.) in 1975 to maintain and raise the standard of drugs. For conducting systematic and scientific research the CCRH was established in 1975 and to set up a model Institute in the field of Homoeopathy. National Institute of Homoeopathy was established at Calcutta (West Bengal) in 1978. Govt. has introduced homoeopathy in Primary Health Centres in order to the service to the people Govt. has also appointed a Adviser in Homoeopathy on regular basis in 1990.

ADMINISTRATIVE SET-UP OF INDIAN SYSTEMS OF MEDICINE AND HOMOEOPATHY AT THE CENTRE & STATES/UTs AS ON 31-3-1991

CENTRAL LEVEL

At the Central Level Indian Systems of Medicine and Homoeopathy is under the overall charge of Union Health Secretary assisted by Additional Secretary (Health), Joint Secretary, Director (ISM), Adviser (ASYN). Two Deputy Advisers—one for Ayurveda and one for Homoeopathy, Under Secretary (ISM), Deputy Director (P & E), Assistant Director (P&E) and a number of Assistant Advisers, Research Officers, Desk Officers, Section Officers and other supporting staff.

There are four appex bodies for conducting research in the concerned systems of medicine viz. (i) Central Council for Research in Ayurveda and Siddha, (ii) Central Council for Research in Unani Medicine, (iii) Central Council for Research in Homoeopathy and (iv) Central Council for Reserach for in Yoga and Naturopathy. These Councils registered under the Societies Registration Act, 1860 are fully financed by the Government of India. For organisational set up, please refer to page 19.

B. STATES/UTs

1. ANDHRA PRADESH

The Director is the Head of the Department of Indian System of Medicine and Homoeopathy in the State. Three Additional Directors—one each for Ayurveda, Unani and Homoeopathy are working under the control of the Director. One post of State Adviser has been created for the development of Ayurveda in the State. College Principals, Hospital Superintendents, Chief Superintendents, Harbarium Superintendent. Inspector and also the Research Officers of Ayurveda, Unani and Homoeopathy are working under the control of the Director. One Deputy Director (Admn.), one Administrative Officer and one Accounts Officer, three Drug Inspectors for Ayurveda, two for Unani and one for Homoeopathy are also working under the control of the Director in the Headquarters Office.

Further, six posts of Regional Deputy Directors—one each for the six zones of the State have been sanctioned by the Government. The Junior Medical Officer and Senior Medical Officer of the dispensaries located in the districts of the State are under the control of the Regional Deputy Directors. For organisational set up, please refer to page 20.

3. ASSAM

101251

The administrative control of Indian Systems of Medicine and Homoeopathy is with the Director of Health Services. The Director, Medical Education, looks after all matters relating to education of ISM & H. The Director of Medical Education (Ayurveda) also assist the Director of Medical Education in the matters of Education in Indian Systems of Medicine. The organisational structure of ISM&H is schematically presented.

For organisational set up, please refer to page 22.

* 4. BIHAR

Directorate of Indian Systems of Medicine and Homoeopathy is functioning with a Director assisted by three Deputy Directors—one each for Ayurveda, Homoeopathy and Unani Medicine. At District Level with effect from 1-1-1981, the ISM and H is under control of Deputy Suptdt. (ISM) now named as Zila Deshi Chikitsa Padadhikari. Out of 31 posts of Zila Deshi Chikitsa Padadhikari, the distribution is as follows :—

पुस्तकालय

Ayurveda	17
Unani	5
Homoeopathy	9

For organisational set up, please refer to page 22.

5. GOA

There is no separate administrative set up to look after the Indian Systems of Medicine & Homoeopathy in the State. The Directorate of Health Services looks after Indian Systems of Medicine and Homoeopathy.

Work of Homoeopathy and Naturopathy is taken over from Directorate of Medical Services to Dte. of Ayurveda in 1977-78. The Dte. is strengthened with supporting staff for Homoeopathy and audit.

7. HARYANA

Directorate of Ayurveda is functioning with a Director assisted by Deputy Director (Ayurveda). Establishment Officer, Assistant Director (Ay.) and Accounts Officer. At the District level, the control of Ayurveda/Unani field staff is with the District Ayurvedic Officers to improve the working of the dispensaries. 16 posts of district Ay. Officers have been sanctioned. For organisational chart, please refer to page 25.

8. HIMACHAL PRADESH

There is a separate Minister of State for the Department of Indian Systems of Medicine and Homoeopathy in the States.

A Separate Directorate of Indian Systems of Medicine and Homoeopathy is functioning in the State since 1984. The Dte. is headed by a Director, who is a senior IAS Officer, assisted by an Officer on Special Duty (HAS), two Assistant Directors and a Mass Education and Information Officer. There is also a Director (Technical) stationed at Jogindernagar.

At the District Level, there is a District Ayurvedic Officer in each district. The Govt. Ayurvedic College at Paprola (Distt. Kangra) is functioning since 1978.

There are two Govt. Ayurvedic pharmacies, one at Jogindernagar (Distt. Mandi) and the other at Majra (Distt. Sirmaur) under the control of Director (Technical) who is stationed at Jogindernagar. For organisational chart, please refer to page 26.

9. JAMMU & KASHMIR

A separate Directorate of Indian Systems of Medicine is functioning at Srinagar with administrative control over J & K State headed by a Director assisted by one Assistant Director (ISM) for Kashmir Division and two Assistant Controllers of Stores, one each for J & K Division. 11 Assistant District Medical Officers against 12 Administrative Districts in the State are functioning as District Officers for ISM.

Dy. Director, Ayurveda, Jammu has administrative Control over Jammu Diviston and is under Director, Indian Systems of Medicine, J&K. There is no separate infrastructure for Homoeopathy in the State. For organisational chart, please refer to page 27.

10. KARNATAKA

The Directorate of Indian Systems of Medicine & Homoeopathy is functioning under the Director who is assisted by Deputy Directors one each for Ayurveda, and Unani, Physician Gr. II (Nature cure & Yoga), one administrative Officer, one Accounts Officer, one Assistant Statistical Officer with supporting staff.

There is a Drug Licensing Unit attached to the Directorate which regulates the control and manufacture of Ayurveda, Unani and Homoeopathic Drugs. This unit has Drug Inspectors with supporting clerical staff. The Director is the Drug Licensing Authority.

The Government Central Pharmacy situated in Bangalore is under the control of Director, which is headed by a Chief Superintendent, Manufactures Ayurvedic and Unani Medicines and supplies the same to Government Ayurvedic and Unani Hospitals and Dispensaries located in different rural and urban parts of the State.

A Drug Testing Laboratory has been established at Govt. Central Pharmacy, Bangalore to verify the quality of medicines manufactured.

Small herb gardens are being maintained at Bangalore, Mysore and Bellary which are attached to the colleges. Sri Dhanwantri Vana has been established in 37 acres of land at Nagarabhavi near Bangalore University campus for development of Herbarium. About 500 herbs are raised.

There are two statutory Boards to regulate the practice of medicine. They are :

(i) Karnataka Ayurvedic and Unani Practitioners Board, Bangalore.

(ii) Karnataka Board of Homoeopathic system of Medicine, Bangalore.

Grant-in-aid rules have been amended and employees of five aided Ayurvedic institutions are paid 100% salary by the Government. Tripple Benefits Scheme has been introduced in five private Ayurvedic Colleges and Hospitals.

A clinical Research Unit in Unani System of Medicine has been established at Sri Jayachamarajendra Institute of Indian Medicine, Bangalore by the Government of India. Also Research on Madhu-Meha (Diabetis) has been undertaken by the Research wing attached to the above said institute at Bangalore.

The Health Minister looks after the Indian Systems of Medicine and Homoeopathy along with Health Department (Allopathy), since there is no separate Minister in the State to look after the Indian Systems of Medicine and Homoeopathy. For organisational chart, please refer to page 28.

11. KERALA

The Department of Indian Systems of Medicine is under the control of the Minister of Health and Family Welfare for the State. The Directorate of Indian Systems of Medicine (Ayurveda, Siddha and Nature Cure) is functioning with a Director, assisted by one Joint Director, Deputy Director, Administrative Officer, Accounts Officer, etc. at the headquarters and 14 District Medical Officers at District level. Chief Medical Officers, Senior Medical Officers and Medical Officers of Government of Ayurveda, Institutions are under the immediate control of the concerned District Medical Officer.

The District Medical Officer is assisted by a Senior Superintendent, Junior Superintendent, etc. The functioning of Government Ayurveda Institutions in District and Rural level is controlled by him through Chief Medical Officer, Senior Medical Officers and Medical Officers. The Chief Medical Officer or Senior Medical Officers are incharge of Ayurveda hospitals and Medical Officers are incharge of Ayurveda Dispensaries.

ORGANISATIONAL SET UP

22. *Tamil Nadu*

A separate Directorate was started for all the Indian Systems of Medicine in 1970. A separate Department for Indian Medicine had been created in 1984 under the administrative control of the Commissioner and Secretary and the new Department has been named as Department of Indian Medicine and Homoeopathy. Homoeopathy has been brought under the control of Director of Indian Medicine since May, 1984. The Department of Indian Medicine and Homoeopathy is headed by an IAS Officer since 1982. Department of Indian Medicine and Homoeopathy has been merged with Health Department under the control of Secretary of Health since 1988.

In Headquarters, the Director of Indian Medicine and Homoeopathy is assisted by a Joint Director, Special Officer, Scrutinising Medical Officer, Personal Assistant, Administrative Officer and Assistant Accounts Officer. There are 19 District Siddha Medical Officers and they control the Dispensaries. The Siddha Wings in District Headquarters hospitals, Taluk and Non-Taluk hospitals and Primary Health Centres and Ayurveda Wing including Panchakarma Clinic in District Headquarter Hospitals. These Siddha Wings in Taluk Hospitals, Non-Taluk Hospitals and Primary Health Centres, however, are under the control of the Allopathic Medical Officers of the concerned institutions.

24. *Uttar Pradesh*

Indian Systems of Medicine—A separate Directorate of Ayurveda and Unani Services was set up in 1961 under a Director. At the Headquarters, the Director is assisted by 2 Additional Directors (one each for plan and Education), 4 Deputy Directors (one each for education, administration, Plan and Unani), Assistant Drugs Controller and Accounts Officer.

At district level, the activities are carried out by the Divisional Ayurvedic and Unani Officers. There are 29 Regional Ayurvedic and Unani officers in the State to look after 2 districts each. The State Ayurvedic/Unani Colleges and State Pharmacies are under the control of the Ayurvedic and Unani Sewa Nideshak.

A separate Directorate of Homoeopathy started functioning w.e.f. 6th May, 1981 under a Director, who is also Head of the Department. The Director is assisted by Deputy Director (Homoeo.), Assistant Director (Homoeopathic College), Assistant Director (Medical Care) and an accounts officer. One post of Deputy Director (Edn) has also been sanctioned.

At the district level, the administrative control of the State Homoeopathic Dispensaries is vested in the respective Chief Medical Officers/Chief/Sr. Medical Superintendents of District Hospitals. 40 posts of District Homoeopathic Officers have been sanctioned and Officers have already been posted against these posts in the respective districts.

There are ten State Homoeopathic Medical Colleges in Uttar Pradesh which are functioning under the control of the Directorate of Homoeopathy. The principals of these colleges have been declared Drawing and Disbursing Officers. The District Magistrate of the District in which the State Homoeopathic Medical Colleges are functioning have also been designated as Ex-officio Deputy Director (Homoeopathy) for day-to-day control at that level.

TIBETAN SYSTEM :

Tibetan System of Medicine is patronised by H. M. the Dalai Lama. The infrastructure for this system is indicated below. They are all in Non-Government Sector and at present are not aided by the Government of India.

INSTITUTE :

Tibetan Medical and Astro. Institute at Dharmsala, Distt. Kangra (Himachal Pradesh) was first started in 1961. This Institute is a cultural, educational and charitable association registered under the Societies Registration Act, 1960. It was initially inaugurated by His Holiness, the Fourteenth Dalai Lama of Tibet in 1961. The Institute has the following Departments:

1. *Tibetan Medical & Astro. College :*

The College imparts 5 years theoritical work with one year practical training. In recent years 50 youngmen and women joined the Medical Studies and 10 Astro. Students have graduated and are qualified astrologers to work on different calculations, prediction, deviation etc. No more Astro. Students will be for two years as the Astro. Professor wishes to review some of ancient Astro. books.

2. *Pharmacy :*

At present 200 different medicines are made in the traditional way with herbs, gems, metals, minerals and animal extracts. Collection, Cleaning, Storage and Preparation of Medicines are done in this Department.

3. *Museum :*

The Museum displays various raw drugs, ancient surgical Instruments, medical and astrological charts, thangkas icons and material of interest.

4. *Research :*

(a) **Literary research :**

Translation of medical text into English is done so that anyone interested in learning Tibetan Medicine could have access to it. Research on selective diseases is also done to find out

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

efficacy of Tibetan Medicines. At present research on Hypertension is being carried out. This was started since 1987 with joint efforts of Tibetan physicians, Research Department of this Institute and Tibetan Delek Hospital practising modern medicines. So far the Survey Study shows effectiveness of Tibetan medicines on Hypertension. But for a sure proof, further research will be carried out on increased number of subjects.

(b) **Plant Research Section :**

At present undertaking identification of different plants and herbs used in Tibetan medicines to compile a Tibetan Medicinal Plant Book in English.

5. *Astrology and Astronomy :*

This department prepares the annual Tibetan Almana Calendar. It also compiles horoscope and prepares calculations and astrologies for various purposes and occasions.

Note : @ = J&K Rs 100/-per month is paid to each practitioner allocated to Amchi Centre. In other States/Union Territories these are not prevalent.

£ = The information for the previous year has been repeated.

Variations : (i) An additional ward with 6 beds was set up in Himachal Pradesh.

(ii) Three new branch clinics were set up one each in the States of Karnataka, Madhya Pradesh and Uttar Pradesh.

D. HOMOEOPATHY				

There is no Post Graduate facility in Homoeopathy. However, the National Institute of Homoeopathy, Calcutta conducts Post Graduate Diploma Course in Homoeopathy.[1]

NOTE :—

Sl. No. 1 Two Departments were sanctioned in 1980-81, one for Shalya Shalakya and the other for Prasuti Tantra, but the State Government have since opened only a combined Department.

Sl. No. 10 **=MASC Course discontinued since June, 1980. Thereafter no student has been admitted. Admissions started for MD in late 1983 with admission capacity 14 viz., Kayachikitsa (6). Rasa Shastra (6) Ayurved Samhita (6) and Bhaishjya Kalpana(2).

Sl. Nos. 11 to 16 @=The Post Graduate Courses are 100% Centrally assisted in all the Medical Colleges except those Sr. Nos. 11 to 16 in Maharashtra.

*=In three years by rotation (7+7+6).

1. Nos. 23 to 24:Amdisions started in 1986 & 1988-89 respectively though sanctioned in 1982-83.

1991$ . .	8443·3	4378·1	4065·2	23·56	(+)2·11	929	267+	25·72

NOTE: * = The distribution of population by Sex of Pondicherry for 1901 (246, 354). 1931 (258, 628) and 1941 (285, 011) is not available. The figures of these years are, therefore, exclusive of these population so far as distribution by sex is concerned.

£ = Sex-wise distribution of Chandan Nagar (26, 831) of West Bengal and Gonda (18, 810) of Uttar Pradesh is not available.

& = Excludes Pondicherry.

** = Excludes Jammu & Kashmir, as comparable figures of area & population are not available for that State.

+ = The density has been worked out on comparable data.

ff = Sex-wise break-up may not add to total due to rounding off.

$ = Based on provisional results of the 1991 census subject to the following :

1. In 1981 census was not conducted in Assam. Based on the 1971 census and the provisional results of the 1991 census and the population of Assam as on March 1, 1981 has been interpolated.
2. As a consequence of the revised estimate for Assam for the Year 1981, the total population of India as on 1981 has been estimated as 683,329,097 as against the earlier published figure of 685, 184, 292.
3. The 1991 census has not been conducted in Jammu & Kashmir. The provisional population figures for India include the population figure for Jammu & Kashmir projected by the Standing Committee of Experts of Population Projections.

NOTES :

1. In 1981, Census was not conducted in Assam. Based on the 1971 Census population and the 1991 Census provisional results the population of Assam for 1981 has been interpolated.
2. As a consequence of the revised estimates for Assam for the year 1981, the total population of India as of 1981 has been estimattedas 683,329,097 as against earlier published figures of 685,184,692.
3. As a conseffluence of the revised figures, the decadal growth rate for India during 1971-81 has been estimated as 24·66 per cent.
4. The 1991 Census has not yet been conducted in Jammu & Kashmir. The figures are as per projections prepared by the Standing Committee of Experts on Population Projections, October, 1989.
5. Sex ratio is defined as number of females per 1,000 males.

ANNEXURE-I

Organisations for Indian Systems of Medicine and Homoeopathy under the Government of India

RESEARCH	
1. Central Council for Research in Ayurveda and Siddha, Dharam Samaj Bhavan, S-10, Green Park, NEW DELHI-110016.	Autonomous Body Registered under Societies Act. Fully financed by the Central Government.
2. Central Council for Research in Unani Medicine, Panchsheel Shopping Centre, NEW DELHI-110017.	Do.
3. Central Council for Research in Homoeopathy, B-6, Community Centre, Janakpuri, NEW DELHI-110058.	Do.
4. Central Council for Research in Yoga and Naturopathy, Gole Dak Khana, NEW DELHI-110011.	Do.
EDUCATION & REGISTRATION	
1. Central Council for Indian Medicine, 1E/6, Swami Ramatirath Nagar, NEW DELHI-110055.	Established by an Act of Parliament. Fully financed by Central Government.
2. Central Council for Homoeopahty, 10, Community Centre, Basantlok, Vasant Vihar, NEW DELHI-110057.	Do.
LABORATORIES	
1. Pharmacopoeia, Laboratory for Indian Systems of Medicine, Kamala Nehru Nagar, GHAZIABAD (Uttar Pradesh).	Subordinate Office of the Ministry of Health & F.W., New Delhi.
2. Homoeopathy Pharmacopoeia Laboratory, Central Govt. Office Complex, Kamala Nehru Nagar, GHAZIABAD (Uttar Pradesh).	Do.
NATIONAL INSTITUTIONS	
1. National Institute of Homoeopathy, Block-GE, Sector-III, Salt Lake, CALCUTTA-700091.	Autonomous Body registered under Societies Act. Fully financed by the Central Government.
2. National Institute of Ayurveda, Amer Road, JAIPUR (Rajasthan).	Do.
3. National Institute of Unani Medicine, BANGALORE (Karnataka).	Do.
4. National Institute of Naturopathy, PUNE (Maharashtra).	Do.

ANNEXURE II

Research Facilities under Central Council for Research in Ayurveda and Siddha as on 1-4-1991

Institutes/Centres/Units

AYURVEDA

1. Indian Institute of Kayachikitsa(Ay.) PATIALA-147001 (Punjab).
2. Indian Institute of Panchakarma (Ay.) Trichur District, CHERUTHURUTHY-679531(Kerala).
3. Central Research Institute (Ay.), Road No. 66, Punjabi Bagh, NEW DELHI-110026.
4. Central Research Institute (Ay.), Unit No. 1, Near Rajdhani College, New Capital, Ashok Nagar, P.O. BHUBANESWAR-751009.
5. Raja Ramdeo Anandilal Podar Central Research Institute (Ay.), Worli BOMBAY-400018.
6. Regional Research Institute (Ay.), 14, Jagannath Dutta Lane, CALCUTTA-700009(W.B.).
7. Regional Research Institute (Ay.), Madhovilas Palace, Amer Road JAIPUR-303001.
8. Regional Research Institute (Ay.), Taj Manzil, Sardar Bagh, JUNAGADH-362001.
9. Regional Research Institute (Ay.), B-Block, Rajendra Memorial Research Institute Building, Agam Kuan, PATNA-800007 (Bihar).
10. Regional Research Institute (Ay.), 476/6, Sitapur Road, LUCKNOW-226007 (U.P.)
11. Regional Research Institute (DR.), Poojapura, TRIVANDRUM-695012 (Kerala).
12. Regional Research Institute (Ay.), Ullas Bhavan, Kherapathi, Quila Road, P.B. No. 3, GWALIOR-474002 (M.P.).
13. Regional Research Centre (Ay.), Gwalior Road, JHANSI-248003 (U.P.)
14. Regional Research Centre (Ay.), Govt. Central Pharmacy Annexe, Ashok Pillar, Jayanagar, BANGALORE-560011 (Karnataka).
15. Regional Research Centre (Ay.), 1003, Gorepath, NAGPUR-440010.
16. Regional Research Centre (Ay.), Gandhi Bhavan, MANDI (H.P.).
17. Regional Research Centre (Ay.), 'A' Block, Ist floor, North Wing, Indira Gandhi Stadium Complex, Bandra Road, VIJAYAWADA-520010 (A.P.)
18. Regional Research Centre (Ay.), Rehari Chowk, JAMMU-180005 (J&K)
19. Regional Research Centre (Ay.), HASTINAPUR-250404(U.P.).

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

20. Regional Research Centre (Ay.), Tadung, GANGTOK-737101 (Sikkim).

21. Regional Research Centre (Ay.), Senki View, NEW ITANAGAR-791110.

22. Regional Research Centre (Ay.), Govt. Ayurveda College, Jalukbari, GAUHATI-781014 (Assam).

23. Dr. A. Lakshmipathi Research Centre in Ayurveda V.H.S. Medical Centre, T.T.T.I. Post Office, MADRAS-600113 (T.N.).

24. Ayurvedic Research Unit, National Institute of Mental Health and Neuro-Sciences, P.B. No. 2779, Hosur Road, BANGALORE-560029.

25. Indian Institute of Ayurveda (Drug Research), Tarikhet-263645, RANIKHET (U.P.).

26. Jawaharlal Nehru Ayurvedic Medicinal Plants Garden and Herbarium Kothrud, PUNE-411029 (Maharashtra).

27. Captain Srinivasa Murti Drug Research Institute for Ayurveda, A.A Govt. Hospital Campus, Arumbakkam, MADRAS-600106 (T.N.).

28. Documentation of Publication Division, D-5, Green Park, NEW DELHI-110026.

29. Indian Institute of History of Medicine, Osmania Medical College Building, Putlibowli, HYDERABAD-500001 (A.P.).

30. Clinical Research Unit (Ay.), Arya Vadiyashala Hospital and College KOTTAKKAL-676503 (Kerala).

31. Clinical Research Unit (Ay.), Govt. Ay. Hospital, Charminar, HYDERABAD-500002 (Andhra Pradesh).

32. Mobile Clinical Research Unit, Deptt. of Kayachikitsa, Institute of Medical Sciences, Banaras Hindu University, VARANASI-221005 (U.P.)

33. Mobile Clinical Research Unit, Gulabkunverba Ayurvedic College, Gujarat Ayurved University, JAMNAGAR-361008 (Gujarat).

34. Drug Standardisation Unit, Department of Modern Pharmacy, Dhanvantari Mandir, Gujarat Ayurved University, JAMNAGAR-361008 (Gujarat.)

35. Drug Standardisation Unit, Department of Dravyaguna, Institute of Medical Sciences, Banaras Hindu University, VARANASI-221005 (U.P.).

36. Literar Research Unit, C/o, Dr. A. Lakshmipathi Research Centre for Ayurveda, VHS, Medical Centre, TITI Post Office, MADRAS.

37. Composite Drug Research Scheme Enquiry, Central Drug Research Institute, Post Box No. 173, LUCKNOW-226002 (U.P.).

38. Clinical Research Unit (AT), Deptt. of Kayachikitsa, Institute of Medical Sciences, Banaras Hindu University, VARANASI-221005.

39. Clinical Research Unit (MT), Deptt. of Medicine, Institute of Medical Sciences, Banaras Hindu University, VARANASI-221005 (U.P.).

40. Pharmacognosy Research Unit, Deptt. of Botany, Calcutta University, 35, Ballygunge Circular Road, CALCUTTA-700019 (W.B.).

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

41. Pharmacognosy Research Unit at J.N.A.M.P.G.H. Kothrud, POONA.

42. Pharmacological Research Unit, Deptt. of Pharmacology, Medical College, TRIVANDRUM-695001(Kerala).

43. Pharmacological Research Unit, Deptt. of Pharmacology, K.G. Medical College, LUCKNOW-226003 (U.P.).

44. Pharmacological Research Unit, Deptt. of Pharmacology, Instt. of Medical Sciences, Banaras Hindu University, VARANASI-221005 (U.P.).

45. Pharmacological Research Unit, Deptt. of Pharmacology, University College, of Medicine, 244-B, J.C. Bose Road, CALCUTTA-700020 (W.B.).

46. Pharmacological Research Unit. S.M.S. Medical College, JAIPUR.

47. Pharmacological Research Unit C/o, C.R.I. (Ay.), Punjabi Bagh, NEW DELHI.

48. Toxicity Studies Unit, Deptt. of Pharmacology, Maharani Lakshmi Bai Medical College, JHANSI (U.P.).

49. Chemical Research Unit, Deptt. of Chemistry, University College of Sciences, Osmania University, HYDERABAD-500067 (A.P.).

50. Chemical Research Unit, Deptt. of Chemistry, University College of Sciences and Technology, 92, A.P.C. Road, CALCUTTA-700009 (W.B.).

51. Chemical Research Unit, Deptt. of Chemistry, University of Medical Sciences, Banaras Hindu University, VARANASI-221005.

52. Amchi Research Unit, Amchi Association Building, LEH-194101 (J&K).

53. Research Scheme on Screening of Contraceptive Agents, New Civil Hospital, AHMEDABAD-16 (Gujarat).

54. Research Scheme on Screening of Contraceptive Agents, Regional Research Institute (Ay.), 14, Jagannath Dutta Lane, CALCUTTA-700009.

55. Research Scheme on Screening of Contraceptive Agents Regional Research Institute (Ay.), Madhovilas Palace, Amer Road, JAIPUR-302001 (Rajasthan).

56. Research Scheme on Screening of Contraceptive Agents Indian Institute of Kayachikitsa, PATIALA-147001 (Punjab).

57. Research Scheme on Screening of Contraceptive Agents Deptt. of Obstetrics and Gynaecology, S.A.T. Hospital Medical College, TRIVANDRUM-695011 (Kerala).

58. Research Scheme on Screening of Contraceptive Agents Deptt. of Prasuti Tantra, Institute of Medical Sciences, Banaras Hindu University, VARANASI-221005 (U.P.).

59. Research Scheme on Screening of Contraceptive Agents Deptt of Pharmacology, Medical College, TRIVANDRUM-695011 (Kerala).

CC-0. In Public Domain. Gurukul Kangri Collection, Haridwar

Digitized by Arya Samaj Foundation Chennai and eGangotri

60. Research Scheme on Screening of Contraceptive Agents, Surgical Research Laboratory, Institute of Medical Sciences, Banaras Hindu University, VARANASI-221005 (U.P.).

61. Research Scheme on Screening of Contraceptive Agents, Raja Ramdeo Anandilal Podar Central Research Institute (Ay.), Worli, BOMBAY.

62. Research Scheme on Screening of Contraceptive Agents, Regional Research Institute (Ay.), 476/6, Sitapur Road, LUCKNOW (U.P.).

63. Research Scheme on Screening of Contraceptive Agents Deptt. of Gynaecology, Orissa Veterinary College, BHUBANESWAR-751003 (Orissa).

64. Research Scheme on Screening of Contraceptive Agents, Deptt. of Bio-Chemistry, Gujarat Ayurvedic University, JAMNAGAR-361008.

65. Tribal Health Care Research Project, ZIRO (Arunachal Pradesh).

66. Tribal Health Care Research Project, CAR-NICOBAR (Andaman & Nicobar).

67. Tribal Health Care Research Project, Ranka Block, Distt. PALAMAU (Bihar).

68. Tribal Health Care Research Project, Rama Block, Distt. JHABUA (M.P.).

69. Tribal Health Care Research Project, Chinchpada Distt. DHULE (Maharashtra).

70. Tribal Health Care Research Project, D.N.K. Colony No. 1. Dharmapura, JAGDALPUR Distt. Bastar (M.P.)-494005.

71. Tribal Health Care Research Project C/o, Sh. L. Jayachandra Singh, Prajatantra Building, IMPHAL (Manipur).

72. Medical Plants Garden-cum-Demonstration Centre, Regional Research Centre (Ay.), New ITANAGAR, Arunachal Pradesh-791110.

SIDDHA

73. Central Research Institute (Siddha) A.A. Govt. Hospital Campus Arumbakkam, MADRAS-600106 (Tamil Nadu).

74. Regional Research Institute (Siddha) Govt. of Pharmacy (Upstairs) Indra Nagar, Gorimedu, PONDICHERRY-605006.

75. Drug Standardisation Unit (Siddha) at Captain Srinivasa Murthy Drug Research Institute for Ayurveda, A.A. Govt. Hospital Campus, Arumbakkam, MADRAS-600106 (Tamil Nadu).

76. Drug Standardisation Unit at Regional Research Centre (Ay.), Govt. Central Pharmacy Annexe, Ashoka Pillar, Jayanagar, BANGALORE-360011 (Karnataka).

77. Drug Standardisation Unit at Regional Research Institute (DR) Poojapura, TRIVANDRUM-695012 (Kerala).

78. Mobile Clinical Research Unit (Siddha) Central Research Institute(s) A.A. Govt. Hospital Campus, Arumbakkam, MADRAS-600106 (T.N.).
